

*Generation NeXt Parenting: A Savvy Parent's Guide to Getting it Right*  
by Tricia Goyer

## **Revolutionary Parenting Handbook for Generation X Helps Readers Better their Children's Futures**

More than 44 million Generation Xers live in the United States today. This significant group is bound to have a strong influence, not only on society as a whole, but more specifically, on the next generation—their children. There's no denying that the world is a vastly different place from the one Gen Xers grew up in, and they are faced with a whole new set of parenting challenges their predecessors could never have fathomed. But Gen Xers have proven they have the passion and drive to excel in childrearing and now they can do just that with the help of a revolutionary new parenting handbook designed exclusively for them.

*Generation NeXt Parenting* is unlike any other book on the market and represents a new adventure in parenting. Written by Tricia Goyer, a Gen X mom herself, it takes readers on a walk down memory lane to learn what defines them as a generation and how they can parlay their own insecurities, hopes, and dreams into bright futures for their children. With its easy-to-read, conversational style, fun pop culture references, practical tips, and real-life examples from families who harbor the same doubts, questions, and concerns, *Generation NeXt Parenting* strips away external distractions to focus on what it takes to raise kids into productive citizens and servants for God.

“As a Gen Xer who graduated from high school in 1989, the way I parent is different from the generations who've gone before me,” says Goyer. “I want to do it all—find God's purpose in my life, impact my community, support my spouse, and provide my children every opportunity available to them. My generation is serious about parenting—just look at all we expect from our children and ourselves! This book offers solutions to our unique questions and confirms that we *can* ‘parent right’—even if it looks nothing like the way our own parents did it. More importantly, this book focuses on seeking God's Word and wisdom for answers to growing a new generation of God-seekers.”

*Generation NeXt Parenting* is an insightful new book that helps readers balance kids, ministry, work, and service, teaching them how to be better parents for God's glory. More than just another parenting book filled with unrealistic expectations for raising “perfect” children, *Generation NeXt Parenting* offers real advice, next steps, and biblical references that can easily be applied to everyday living situations. A powerful resource, it is positioned to spawn a whole new breed of parents readily equipped to make a positive difference, not only in the lives of their children, but for generations to come.

**Tricia Goyer** has played an active role in Bible study groups, parenting programs, and young mom support groups for eleven years. She has written more than 250 published articles, four historical novels, hundreds of Bible study notes, two nonfiction books, and one children's book. She lives in northwest Montana with her husband and their three children.
